

## PEMF Coil – How to connect

### **Warning:**

**Do not remove or insert any plugs whilst Spooky Central is powered on.**

**Turn off at the mains switch at the rear of Spooky Central. The switch light should be off and there should be no fan noise.**

This document shows how to correctly connect your PEMF Coil.

1. Be careful to make a firm connection between the socket and the adapter:

Bad:

Good:

2. The connection between the adapter and the coil must also be tight. Even a small gap will interfere with the normal function of the coil.

Bad:

Good:

Here is the full view showing the correct connection among the socket, adapter and the coil.
