#### [My Journey with Spooky2 in Battling Multiple Sclerosis Since May 2024](#) ❤️

I have Multiple Sclerosis and I wanted to tell you all of the initial success I am having running the **Epstein Barr-Virus (DNA) (R) – JW (CUST) base preset: DNA (Dual) (R) – JW** on one [XM generator](#) and Detox Maintenance (R) JW on the other. Every 2-3 days I stop the EBV preset and run my latest **Biofeedback frequencies**. I keep Detox Maintenance running throughout the whole process.

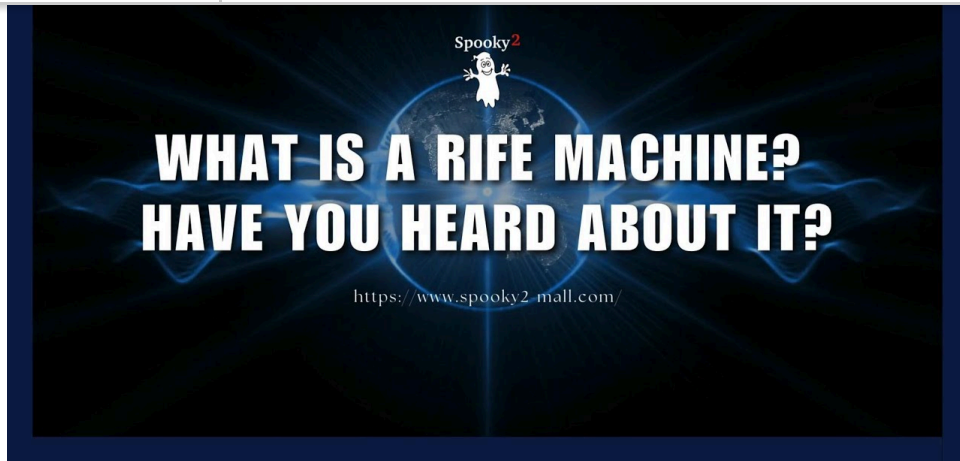

I have been able to walk around the park daily unaided where I used to have to hold my husband's hand due to fear of falling (I broke my shoulder and rib last November from a fall). I have also noticed that since I have been doing the EBV preset / Biofeedback frequencies/detox maintenance protocol, I am also not using my walking stick as much and have much less brain fog.

A Rife machine is a frequency therapy device based on the work of Dr. Royal Rife, who believed that specific electromagnetic frequencies could target and eliminate pathogens, such as bacteria and viruses. It is thought to **work by emitting low-energy radio waves that resonate with the frequency of the disease-causing organisms**, potentially destroying them without harming the body.

## Spooky2 Q&A 💡

### [Can rife frequencies damage good bacteria in the gut?](#)

Rife machines will not harm normal cells while targeting specific pathogens. Firstly, normal cells and harmful microorganisms have different resonance frequencies. The Rife machine focuses on transmitting precise frequencies specific to the pathogen, causing resonance and eliminating the pathogens within your body without causing harm to normal cells. ### [Can you use Spooky2 as an ultrasonic machine?](#)

This type of use would require an amplifier -- much like how the [Central](#) acts as an amplifier to drive the plasma bulb. The central has an ultrasonic output, but it is not a direct frequency output port.

It will run the ultrasonic as a harmonic of the plasma input frequency, which

### [How do I stop the generator numbers from changing?](#)

Windows will assign new port numbers at boot time if the old port numbers don't respond or have errors. Plug them into the USB hub in Port number order about 30 seconds apart after a computer reboot. [Click here to see more details.](#)

### [Can one treat more than one issue in one day?](#)

There's no recommended minimum or maximum. It depends on the person being treated and what they have.

If the frequencies being used happen not to hit any pathogens, you can pretty much leave it on all day. [Click here to see more details.](#)

### [What is the highest frequency the GenX Pro can do with wave multiplication?](#)

You can program what you wish; both the PC and Gx screens will show what you have programmed. In Spooky there are 1024 datapoints in every wave cycle.

Every one of these data points requires the chipset to switch on or off to produce the digital signal. Next, the best chance of achieving an output over 40 MHz is with a sine wave, period! [Click here to see more details.](#)

That's all for this week. Take care :)
