[How can I create custom frequencies?](#)

You have to use Menu File > Create Program.

Type the program name you want in the program name field, type the frequencies you wish to in the frequency field, separated by commas without spaces, enter the default dwell time, and hit save.

The new set will be available after refreshing the database (Menu Database > Refresh database).

The new frequency sets are located in your Custom Database, named Custom.csv by default. The main database can't be modified by the user. [Click here to see more details.](#)
